

# TANK & PIPE TEST RIG

## DESIGN

- Peli waterproof casing to withstand the knocks of day-to-day use and durability
- Dimensions:  
length - 370mm  
width - 300mm  
height - 165mm

## TECHNICAL DATA

- Ability to test five lines at once
- Sub-manifold enabling testing on each pipe island
- ATEX approved digital gauge
- For pipework testing -1 - 30 bar at 10 mBar increments
- For tank testing -1 - 3 bar at 1 mBar increments

## ADDED EXTRAS

- Caps, plugs and test bung sets: Broad range available - typically from 1" to 4"
- Recalibration Service: Recalibration of ATEX approved digital gauge and testing of valves and manifold for functionality

## STA CUSTOMERS SAY

Having purchased a couple of rigs from STA, our installers now wouldn't be without them. With day-to-day knocks on forecourts and in the back of the van, these rigs have a hard life. This is where STA's refurbishment service steps in, overhauling the gauges to deliver 100% accuracy and ensuring the rig is fit for purpose at all times." - **Simon Bayliss, Kidderminster Petroleum Services**

"We have been looking for a robust, accurate test rig that can be easily transported but take the knocks and bumps of site use and STA has given us the perfect solution." - **Westfield Services**
